School Health Service

Dear Parent/Carer,

As your child has now started Secondary School, we are emailing you a health questionnaire. We would like your child to complete this, with your help. This will help the School Health Service, along with other agencies, support your child, with any identified health needs they may have.

All health-related information is kept confidential but in some instances some medical conditions that require management in school i.e. asthma, may be shared on a need-to-know basis with some other services, including the school, to be able to better support your child in school. The School Nurse will contact you and your child to discuss the need to share other health-related information where relevant.

If you do not agree with health information being shared routinely or would like to contact the School Nurse, please contact us on the above telephone number or email address.

Please can you kindly complete and return this health questionnaire online within two weeks following the link provided. This will assist the School Health Service with planning what health information and support we deliver to children and young people in school.

Your child may be seen at school by the School Health Service with their consent. You will necessarily be contacted.

Yours sincerely

School Health Service
